## Coronavirus - Information for patients and accompanying persons

Across Europe, patients are currently being infected with the coronavirus. We have compiled some basic instructions for you below.

### Patients

- You receive one face mask for the whole stay (Please keep and reuse)
- Reduce walking around the clinic to a minimum
- Always wear your face mask outside the room and if you are in contact with hospital staff inside your room

### Accompanying persons

From May 9, 2020, every patient can be visited by one person. This person is also allowed to accompany a patient giving birth.

- Re-entry on the same day is not possible
- Visiting hours: 2:00 p.m. - 5:00 p.m.
- The visitor receives a face mask. (Please mark with name, keep it safe, air it out overnight and reuse it)
- Visitors will not be allowed to enter the clinic without their face mask
- If, within the last 14 days, you had contact with a Covid-19 positive person, any signs of respiratory disease or a fever, please stay at home
- Always wear your face mask
- Wait outside on discharge day and do not enter the hospital building
- Bring everything needed on discharge day (e.g. baby seat) to the clinic the day before

### Hygiene instructions

- Wash your hands frequently and thoroughly (30 seconds)
- Practise good cough and sneeze etiquette
- Keep your distance (at least 1 meter) to other people
